

Accuracy max $\pm 0.075\%$
 Range 1 mbar \div 20 bar
 Hart communication
 LCD backlight display
 Settings via display
 Fast time responsive self-diagnostics
 ATEX

SDT is a differential pressure transmitter with performance at the top of the range and is designed for specific installations in processes where accuracy and stability over time are essential characteristics. Thanks to its technology it measures very low differential pressures from 1 mbar (10 mm H₂O). The SDT is fully programmable by means of two external watertight buttons and a matrix backlight display. The programming or modification of the measurement parameters can be carried out in heavy duty ambient conditions without having access to the internal instrument parts thus maintaining the degree of protection IP67.

Technical Feature

Measure range

Differential pressure Max. 0÷20bar (0÷2Mpa); Min. 0÷0.001bar (0÷100Pa)

Accuracy

± 0.075 ; ± 0.1 for range A

Analog output resolution

15 bit

Communication protocol

HART

Zero and span calibration

onboard buttons

Data display

backlit alphanumeric display

IP rating

IP67

Stability

$> \pm 0.1\%$ FS

Working temperature

$-40^{\circ} \div +85^{\circ}\text{C}$

Certificazione

Atex

SDT Differential pressure transmitter
IP67 - Operation temperature: -40 ÷ +85°C
Power supply: 12÷42Vdc (2-wire)
4÷20mA HART
